

A geography research proposal typically includes the following sections:

- **Title:** A clear, concise, and informative title
- **Introduction:** A brief overview of the research topic
- **Significance:** Why the research is important and should be conducted
- **Literature review:** A comprehensive overview of existing literature on the topic
- **Methodology:** A description of the methods and techniques the researcher will use
- **Research plan:** A timeline, resources, and budget for the research work
- **Expected outcomes and impact:** An explanation of the research's expected findings and their consequences
- **References:** A list of references
- **Timetable:** Create a timetable to allocate time limits to tasks and ensure the project is completed on time
- **Resources:** List the resources needed for the project, such as equipment, transport, skills, and software

- ▶ Here are some other things to consider when writing a geography research proposal:
 - ▶ Length: A research proposal is typically between 3,000 and 10,000 words
 - ▶ Ethical considerations: If the research has ethical considerations, include a section to address them
 - ▶ Operational definitions: Clarify the meaning of key terms used in the study
 - ▶ Research data sources: Consider whether to collect primary data through interviews and observation, or secondary data by reading other researchers' work
 - ▶ Sampling procedure: Consider how to select knowledgeable participants
