UNIT – 2

Microsoft Word

Dr.P.SATHEESHKUMAR

Guest Lecturer

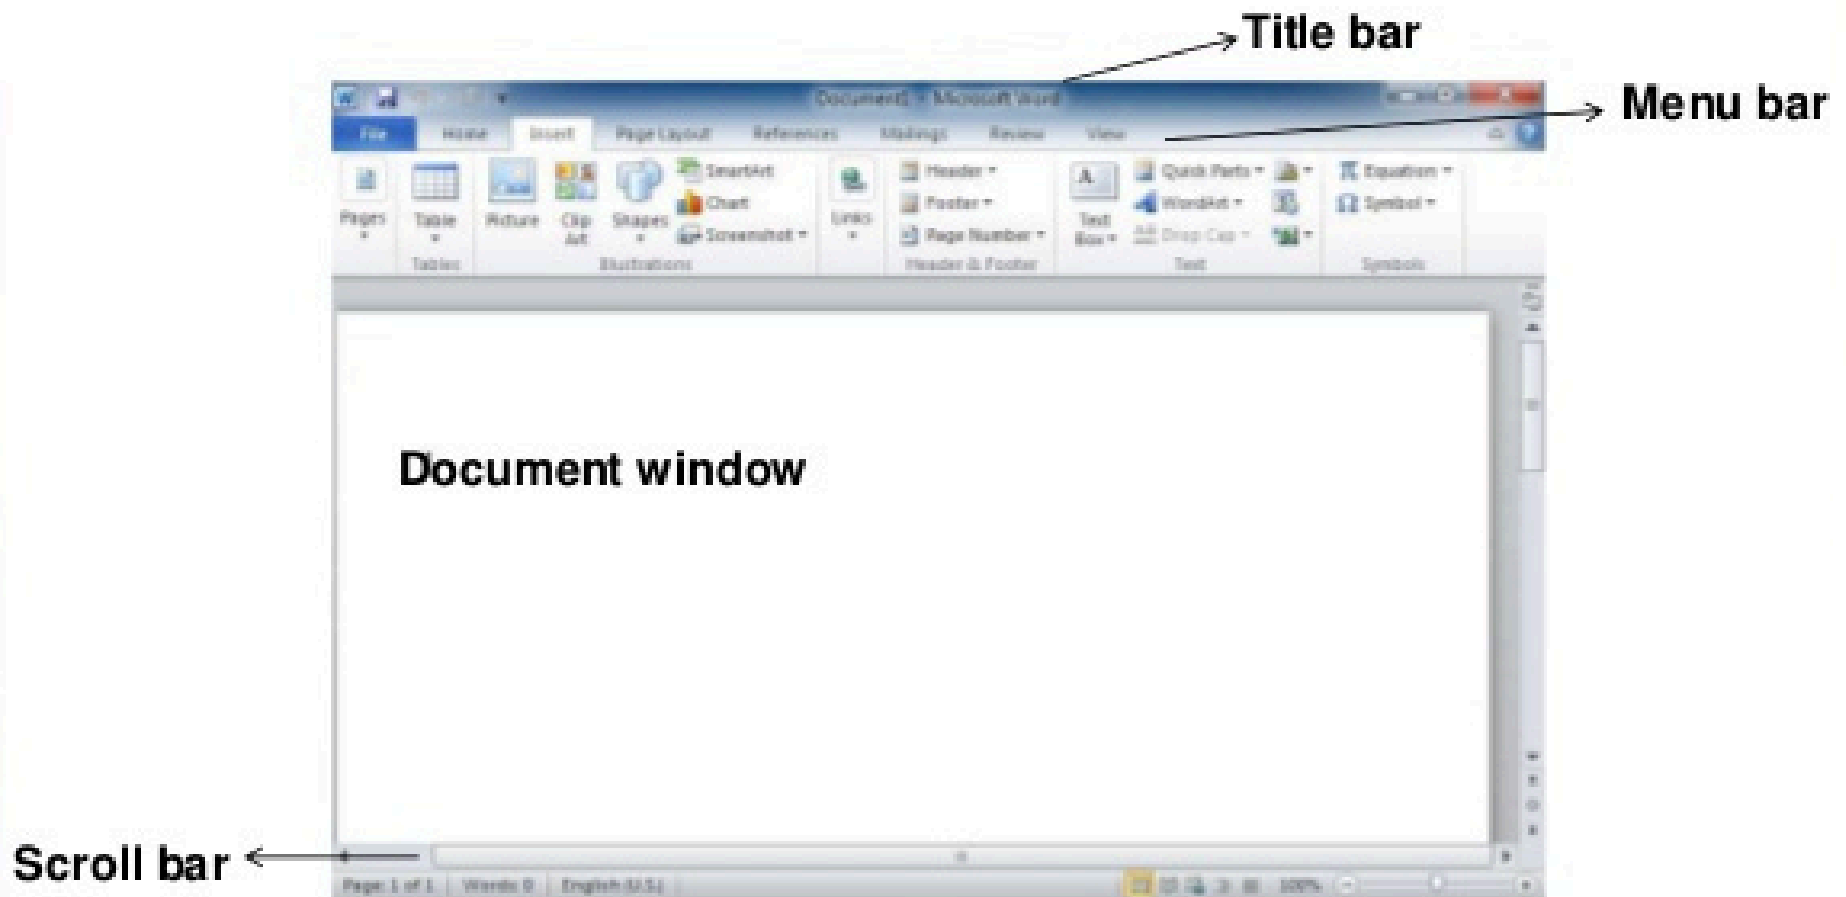

Department of Physical Education and Yoga

What is MS Word?

- MS Word is a word processing program used to create, format, save and print letters, reports, newsletters, manuscripts, signs, certificates other documents.

Introduction

Microsoft Word (often called Word) is a graphical word processing program that users can type with. It is made by the computer company Microsoft. The purpose of the MS Word is to allow the users to type and save documents.

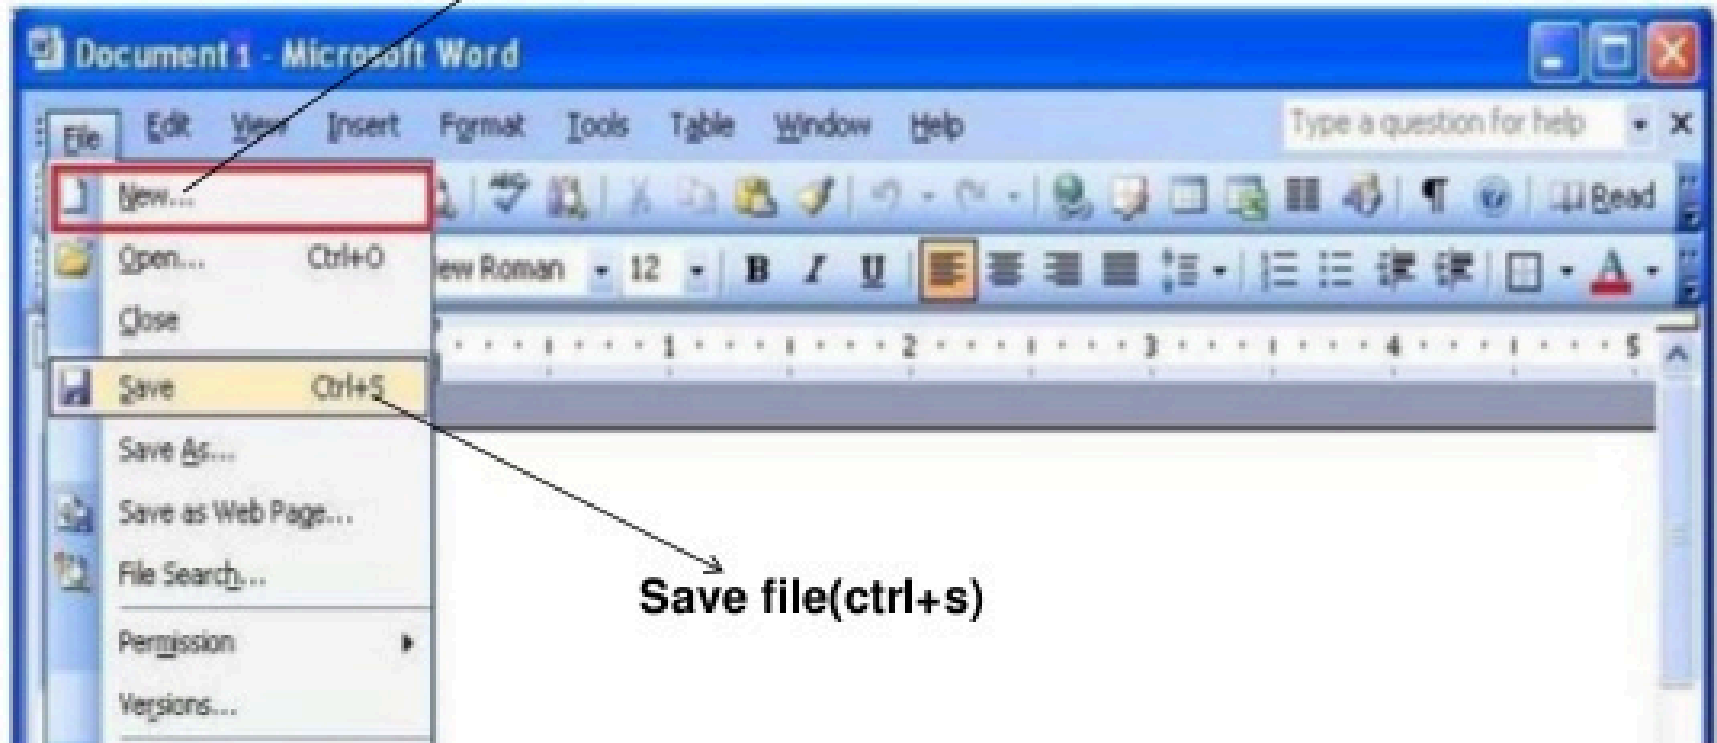

Features of MS Word

- Creating and saving a file
- Editing and formatting a document
- Paragraph formatting
- Inserting header and footer and Page number
- Checking spelling and grammar
- Subscript and superscript
- Inserting symbols
- Print preview and printing
- Inserting clipart, word art, and picture
- Page setting
- Bullets and number
- Border and shading
- Searching a word and replacing it by another word
- Inserting table

Creating and saving a file

Create new file (ctrl+N)

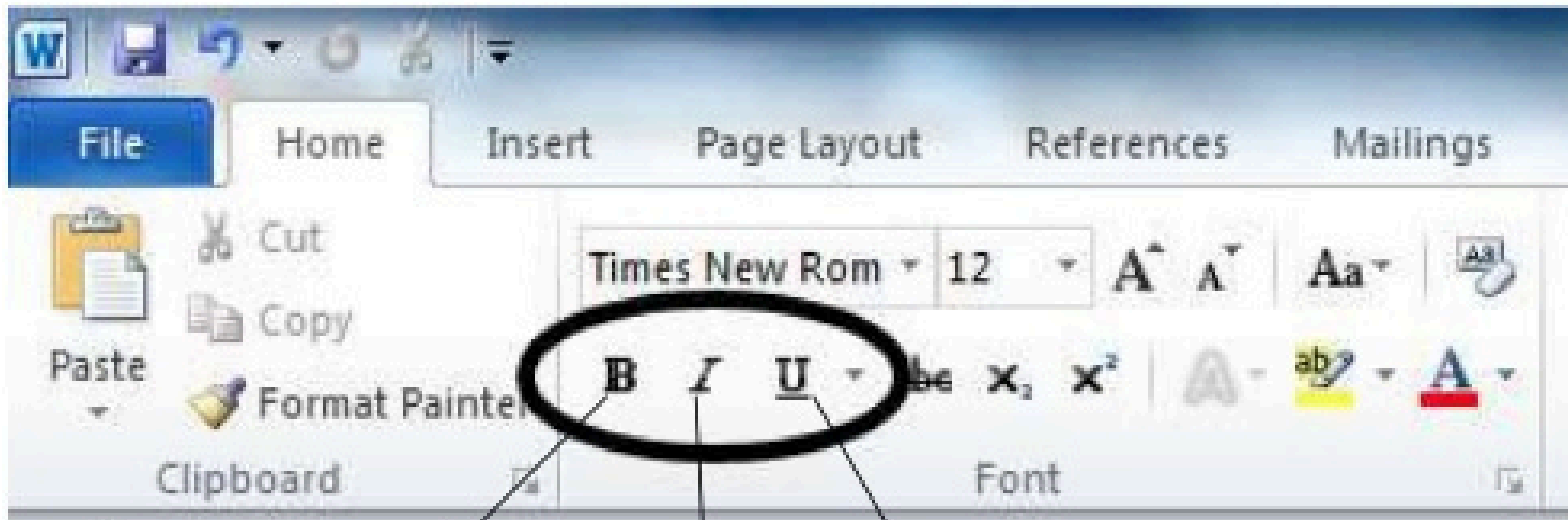

Editing involves all the activities closely associated with“ creating and changing the text in a document”.

Editing is one of the main and more difficult tasks in the composition of a written piece. Editing can only be successful with direct participation of the human writer. It involves a lot of word choice decisions, incorporating sentence structure ideas and keeping the general flow of writing moving towards the intended ends.

Formatting involves all the activities which alter the position and appearance of a documents elements (words, sentences, paragraphs)

The Format of a document is its layout and arrangement. Formatting is not such a time consuming activity, especially for a student’s essay

Your Title

What is paragraph formatting?

A paragraph in Word is any text that ends with a hard return. Paragraph formatting lets you control the appearance of individual paragraphs.

For example, you can change the alignment of text from left to center or the spacing between lines from single to double.

WHAT IS HEADER AND FOOTER?

The **header** is a section of the document that appears in the top margin, while the **footer** is a section of the document that appears in the bottom margin. *Headers and footers generally contain information such as the page number, date, and document name.*

Inserting Header and Footer and page number

Selected Header

Close Header and Footer

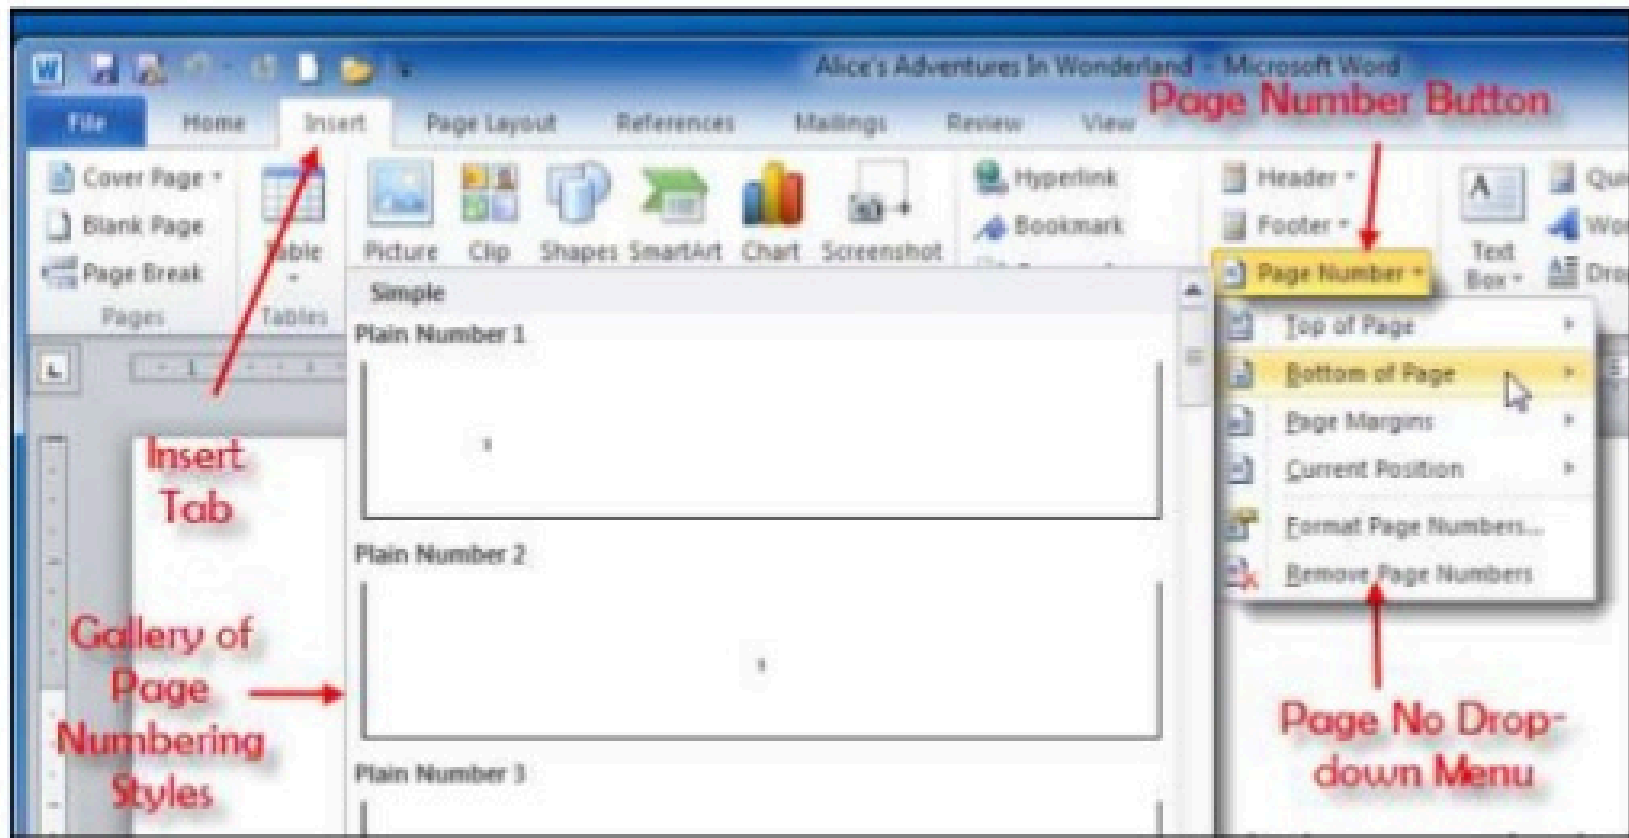

The screenshot shows the Microsoft Word interface with the Insert tab selected. The Header & Footer group is active, and the 'Header & Footer' button is highlighted. The 'Close Header and Footer' button is also visible. The document title '[Type the document title]' is entered in the header area.

On the Insert tab, the galleries include items that are designed to coordinate with the overall look of your document. You can use these galleries to insert tables, headers, footers, lists, cover pages, and other document building blocks. When you create pictures, charts, or diagrams, they also coordinate with your current document look.

Checking Spelling and Grammer

As we talked about in our meeting, my fourteen experience, both in commissioned floor sales and in the role of Sales Supervisor, working at Quality Furnishings. In that time, I have learned many techniques that would increase customer satisfaction ratings at Quality Furnishings.

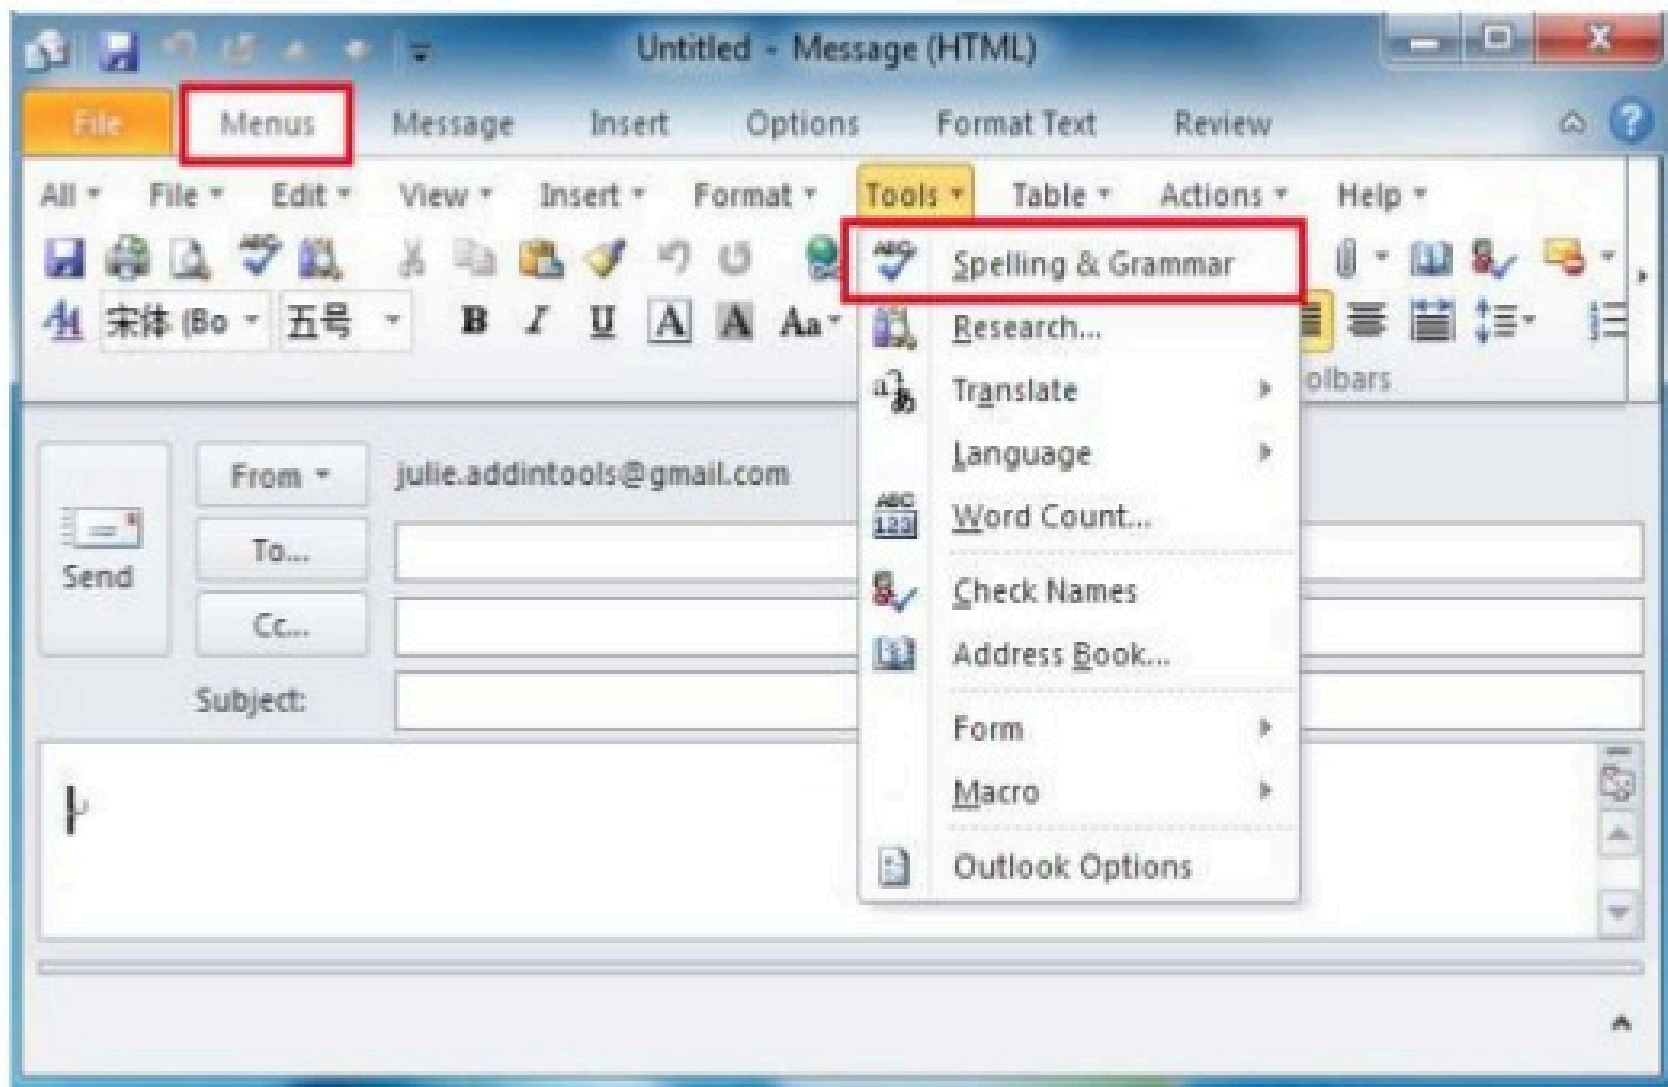

Spelling error

In addition, I wanted to let you no that I have recently recieved my certificate from the Superior Sales Training program at the National Business Institute. several techniques covered in the program are sure to bolster sales. Also, increased customer satisfaction. I look forward to having the chance to impliment them at Quality Furnishings.

Contextual spelling error

The information in filling the Sales Assistant position is free to
consideration. You would like additional information. I look forward to
hearing from you soon.

Grammatical error

Example:

The image shows a screenshot of the Microsoft Word interface. A text box is selected, containing the word "program" which is underlined in red. A context menu is open over the word, listing options: "program", "Ignore All", "Add to Dictionary", "Spelling...", "Cut", "Copy", and "Paste Options:". The "Paste Options" section includes three icons: a document with a checkmark, a document with a pencil, and a document with a large letter 'A'. Above the context menu, the ribbon shows the Font group with options for font face (Calibri), size (36), bold (B), italic (I), underline (U), text color (A), and background color (fill). The background text is partially visible and includes phrases like "Microsoft Word", "that allows for the creation", "of both simple", "The program is", "wizards to help", "such as resum", "There are also", "professional lo", and "documents."

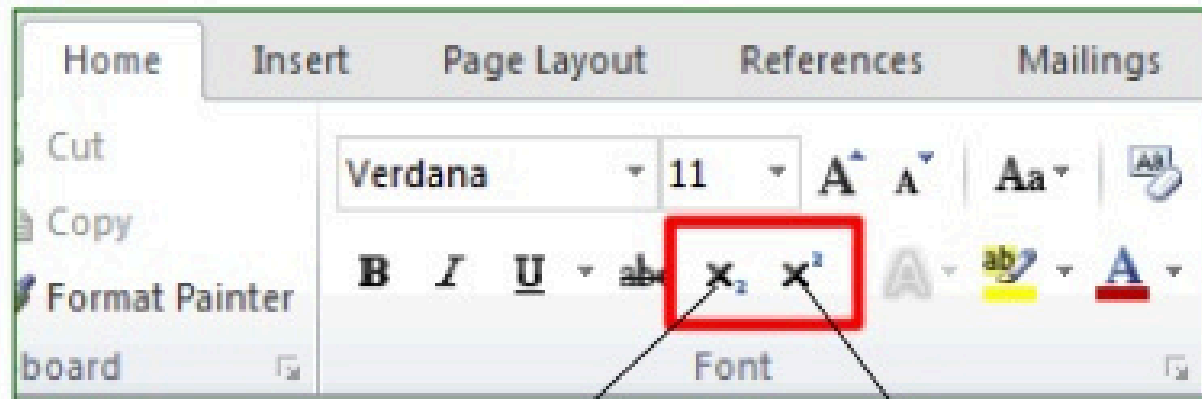

Subscript and Superscript

Superscript example: Per m³

Subscript example: Rate per month₍₁₎

What is **subscript** and **superscript**?

A **subscript** and **superscript** is a character (number, letter or symbol) that is (respectively) set slightly below or above the normal line of type. It is usually smaller than the rest of the text. Subscripts appear at or below the [baseline](#), while superscripts are above. Subscripts and superscripts are perhaps most often used in [formulas](#), mathematical [expressions](#), and specifications of [chemical compounds](#) and [isotopes](#), but have many other uses as well.
